

Urban Mining Impact Report TM

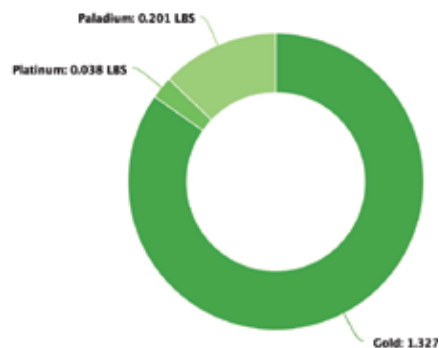

Your electronics recycling decisions make an impact on our local community, as well as the global environment. By choosing to recycle responsibly, you've helped reclaim precious metals, rare earth minerals, and valuable commodities while sparing the environment from toxic materials that are hazardous to humans, plants and animals when disposed of properly.

From your eWaste **Total Weight = 17,813 LBS**, The following mined materials were recovered or reduced due to your decision:

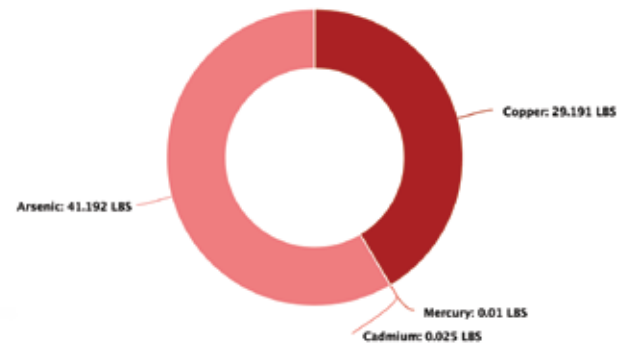

Precious Metal

Commodities

Toxic Metals

These metals are hazardous when extracted improperly or dumped in landfills.

Recovered plastics Total = 10,118.691 LB

By urban mining locally, you've also helped reduce CO2 emissions associated with exporting eWaste. **You reduced Green House Gas emissions by: 48,428.796 LB**

Recycling with Urban Mining creates and sustains local Jobs in Jacksonville.
You helped sustain 3.4 Jobs.

We are an international leader in the recycling of electronics, providing the most secure, environmentally safe and transparent processing available.
